Summary

I am passionate about creating great experiences through data, research and solving problems from outside the box. I am a self taught game developer, and am now geared towards full stack web app development. I am experienced in several languages and frameworks, across multiple applications. I have a total of 8 years of Game Development experience - two of those being in a professional environment, and 2 years of Full Stack Web Development experience.

Experience

Junior Full Stack Developer
Bacon Inc.
Feb 2020 - Present (1 year 8 months +)
•Worked on a team using Agile (and later Kanban) to build a cross platform and responsive app with React and Cordova
•Maintained, fixed and expanded on an SQL database (using ActiveRecord) of over 80,000 users and other records
•Created server processes to automate tasks, fetch complex data sets and reports, including company wide key performance indicators
•Created internal administration tools to manage users and companies
•Worked with and managed AWS S3 buckets for storing user images and other files
•Added to and updated a proprietary UI library for our app

Full Stack Developer Intern
Bacon Inc.
Oct 2019 - Feb 2020 (5 months)

Lead Game Developer
Lucille Games
Oct 2017 - Sep 2019 (2 years)
•Lead a development team on the Roblox platform to create and maintain video games for children and young adults
•Created engaging and appealing game systems using Lua
•Designed user interfaces using Adobe Photoshop and coded them to be intuitive and user friendly
•Worked within and added onto other developer's code and systems

Transcriber
Thinkster
Feb 2019 - Feb 2019 (1 month)

Transcribed Docker development tutorials on Thinkster.io.

Web Development Intern
APSM
Jun 2015 - Jul 2015 (2 months)
•Designed and tested Active Server Pages and Webhooks for use with email servers
•Created and managed databases for storing email information
•Learned and solidified knowledge of C#, SQL, JavaScript, HTML and CSS
